EDUCATION

Vellore Institute of Technology, Vellore	8.98
<i>B. Tech. in Computer Science and Engineering</i>	<i>Present</i>
Govt Sr Sec School, Kishangrah	97%
<i>High School Diploma</i>	<i>2020</i>

WORK EXPERIENCE

BalkanID	Work From Home(Austin,TX USA)
<i>Engineering Intern</i>	<i>Present</i>
- Integrated multiple applications using SCIM, GraphQL, and REST APIs, ensuring bulk data extraction and canonical format adherence. - Collaborated with platforms like PingIdentity, Asana, Jenkins, Code Climate, and SAP, effectively integrating them into the company's ecosystem. Utilized Go, Docker, shell scripting, JSON, and various APIs to streamline and automate data integration processes.	
AppyHigh	Work From Home(Hyderabad)
<i>Android Developer Intern</i>	<i>Apr' 22 - Jun' 22</i>
- Published multiple highly successful apps on the Play Store, amassing 100K+ downloads, showcasing proficiency in Kotlin, Java, and XML with expertise in MVVM architecture. - Wrote clean and efficient code to contribute to the development of Android applications. Collaborated closely with the development team to ensure the timely delivery of projects.	
Ankidroid Organization	Work From Home
<i>Open Source Contributions</i>	<i>Apr' 22 - May' 22</i>
- Solved numerous issues in the repository and successfully #Merged Pull Requests. - Successfully migrated files from Java to Kotlin, resolving numerous bugs, implementing additional functionalities, and authoring comprehensive unit tests.	

PROJECTS

Enigma 8.0 	Nov 2021
- Made an android app for Enigma 8.0 project, an online cryptic hunt with 2500+ participants from 75+ countries. - Utilized Kotlin, MVVM architecture, Retrofit, and XML to develop the application.	
KhetiBuddy 	Jan 2022
Developed Android app for illiterate farmers, providing farming practices, soil card details, and crop-specific exercises. Utilized Flask for backend, deployed machine learning model, and accessed it via HTTPS requests in Java-based app using MVVM architecture.	
RepoSage 	Apr 2023
A Go backend project with Gin framework, extracting repositories and implementing endpoints for dashboard, login, logout, and CSV file downloads. Utilized Gin framework, GORM ORM, and Docker for efficient database operations and enhanced portability.	
Alveoli Detection 	Nov 2022
Developed Python-based Alveoli Detection system using CNN model trained on annotated X-ray images. Created user-friendly GUI with PyQt5 framework for accurate classification of alveoli-related abnormalities.	

VOLUNTEERING EXPERIENCE

Outreach Lead, IEEE-VIT	Dec 2020 - Present
- Responsible for leading the outreach efforts of the chapter, successfully driving registrations and implementing effective strategies to attract participants for events. Achieved an impressive milestone of 2000+ participants from around the globe for the renowned event "Enigma". - Speaker at "Techloop-Alpha", guiding 400+ students in Android Development	

COMPUTER SKILLS

Programming Languages: Python3, C, C++, Java, Go, Kotlin, SQL, JavaScript

Miscellaneous: Linux, Git, GitHub, Postman, PostgreSQL, MySQL, Jupyter Notebook, Android Studio
